Content Development for Blended Learning/ ELearning

We have a team of professionals who help the clients in designing their content from diversified areas from

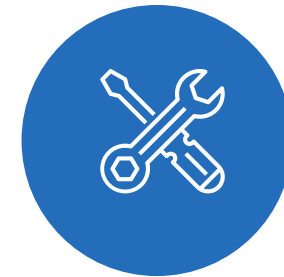

Technology

Commerce

Quality

Management

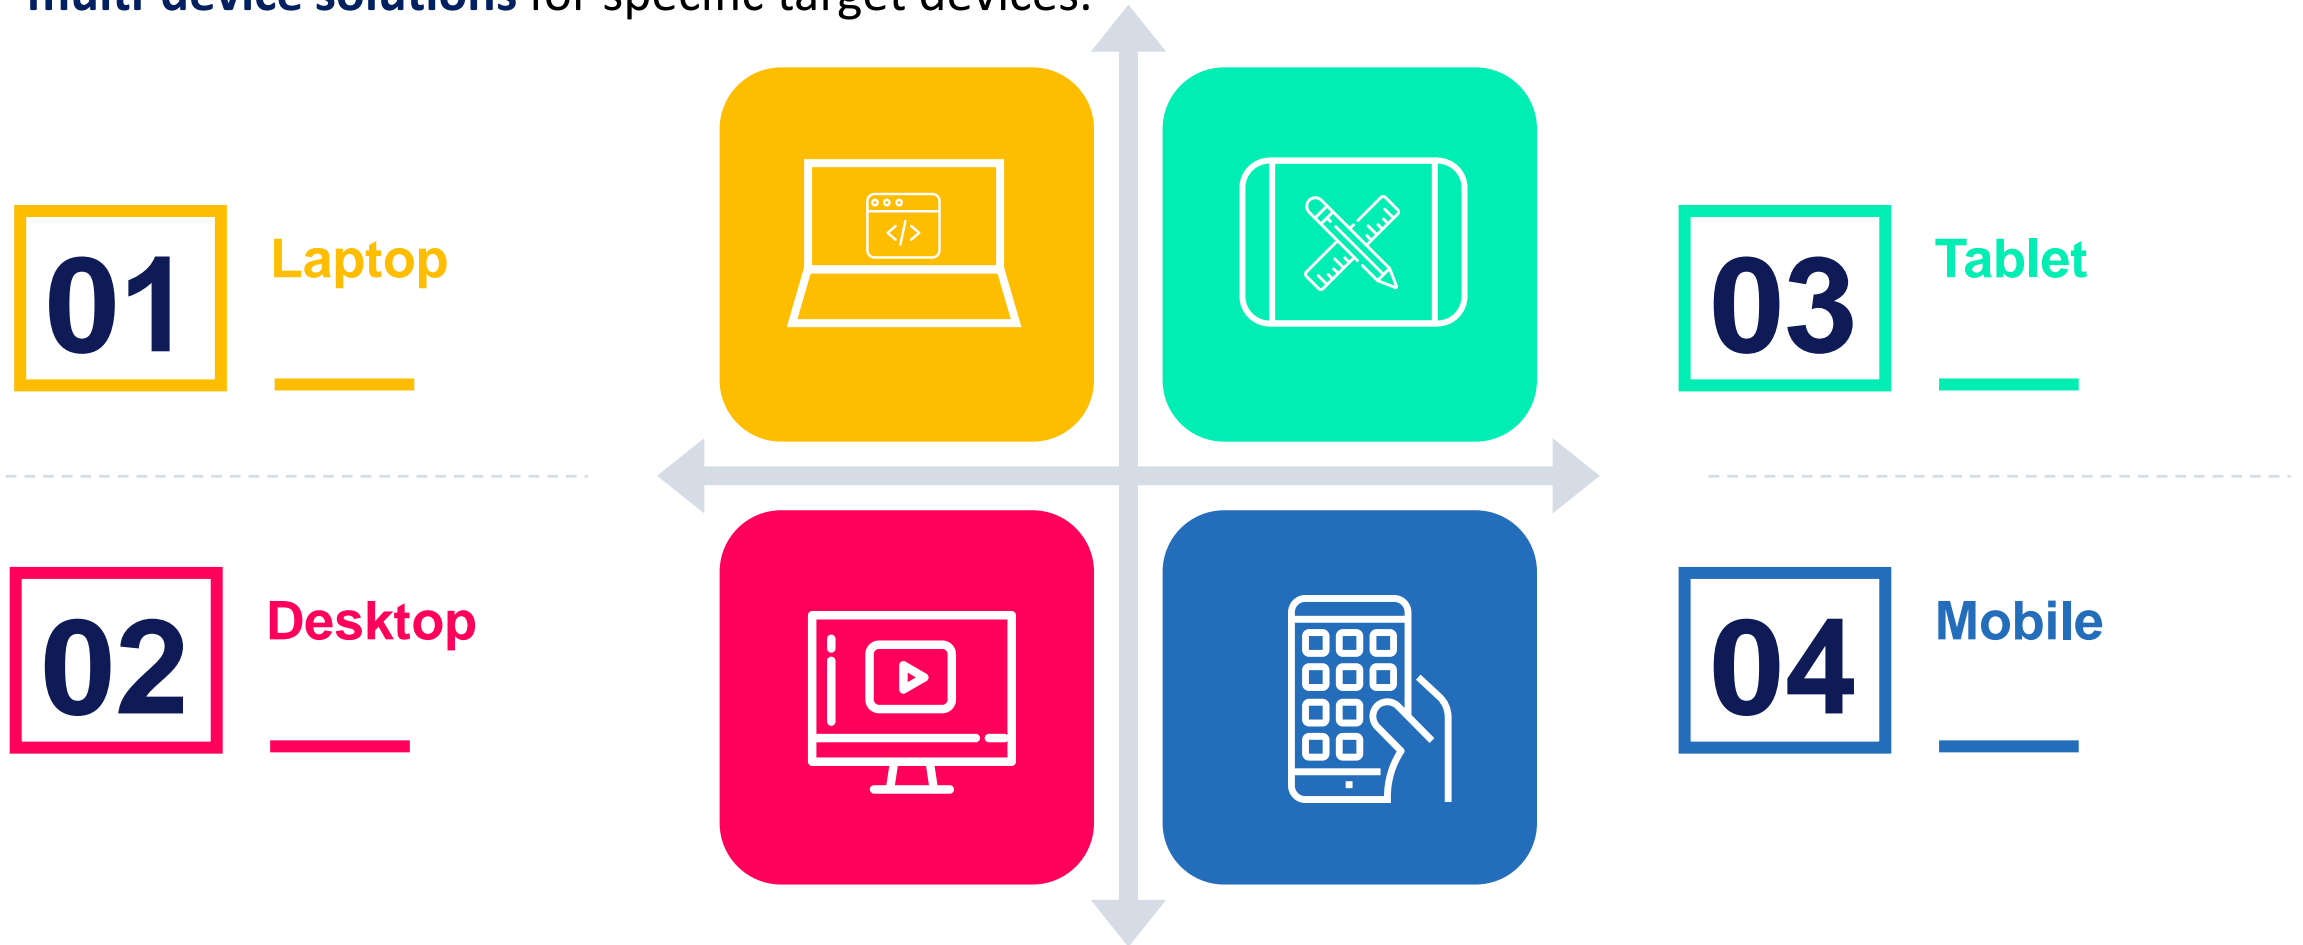

Our **SMEs** are experts in their subjects. Our SMEs provide content for **Blended Learning/ ELearning content development** and the **expertise** to ensure that the content is accurate.

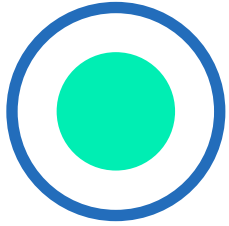

Multi-device Responsive Blended Learning

We create **single-source responsive solutions** that run seamlessly on all devices or create custom **multi-device solutions** for specific target devices.

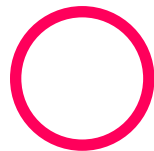

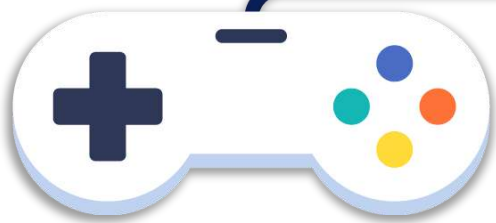

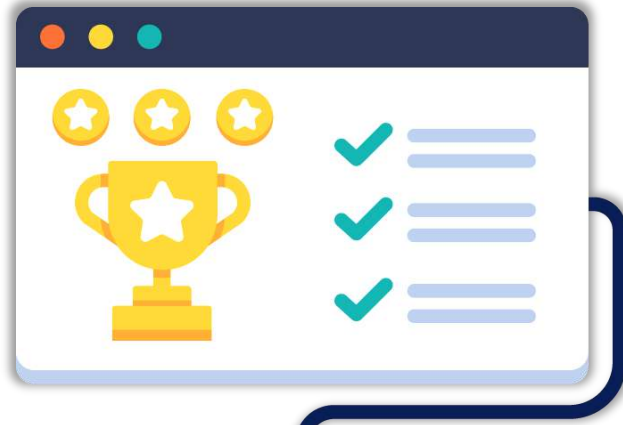

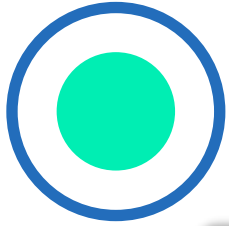

Video Based Lectures

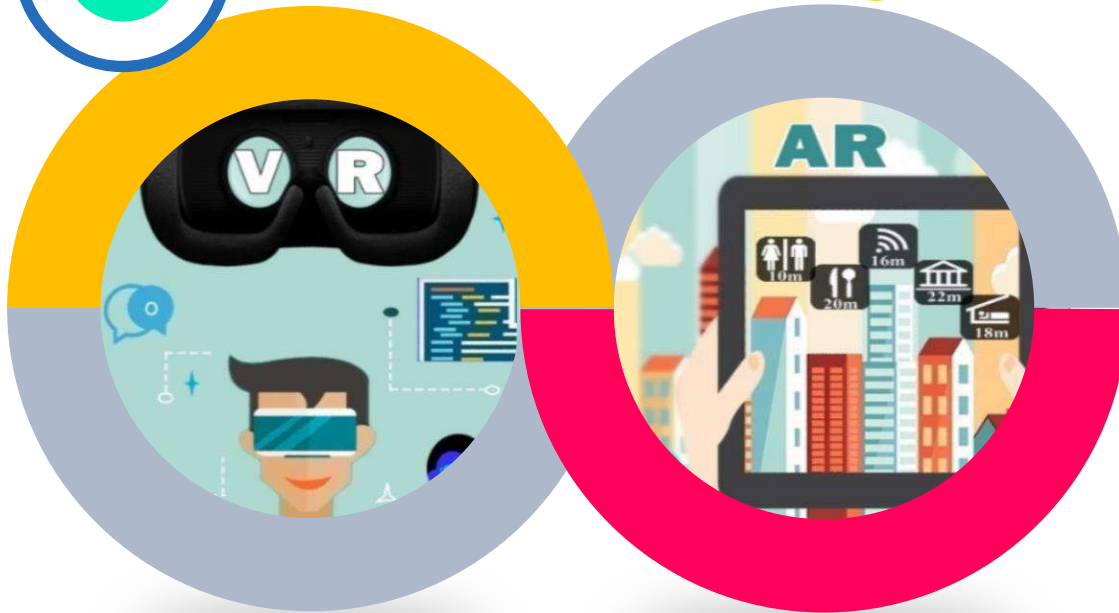

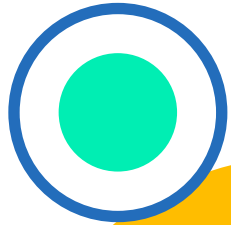

- Our **VBL** stand apart from other online course.
- It gives the **flexibility of learning** with interactive sessions and gives the **feeling of a real-time** traditional classroom lecture.
- With our VBL, learning becomes more **effective, exciting** and **interactive**.

Games and Simulations

- We provide **Gamification** as a part of the Blended Learning/ ELearning solution which help students to learn through a game.

AR, VR & MR Solutions

Our Virtual Reality Augmented Reality & Mixed Reality solutions deliver more value for your learning requirements.

Hands on real-time experience

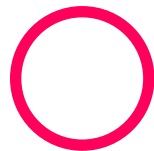

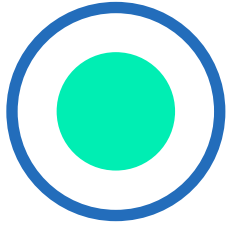

Helps the learner to learn in a more interactive way

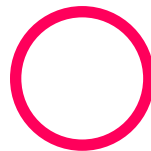

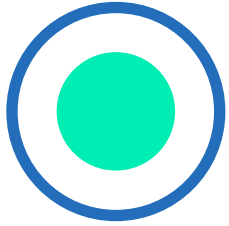

Increases engagement for learners

2D/ 3D Animation and Special Effects

- **Creating the illusion of motion** by the rapid display of a sequence of static images or frames that minimally differ from each other.
- **Animation** will attract and capture the attention of the learners.

Translation and Localization

- Our **end to end translation** and **localization services** for Blended Learning/ ELearning projects can help you translate and localize your content ranging from text translation and audio recording to course packaging.
